Ideal Applications	<ul style="list-style-type: none"> Bin/Container Security Raise profile of recycling Enhance Waste Segregation
Ideal Environments	<ul style="list-style-type: none"> Public Parks & Spaces Social Housing Recycling facilities Community Housing Community Bring Sites Waste Collection Facilities
Summary	<p>Within the Taylor Secure-a-Bin Range our new 4 Wheeled Bin Frames enable operators, collectors and local authorities to secure single and multiple bins at a designated location. This ensures the security of the bins, preventing unauthorised movement of the bin as well as providing a central location for community recycling. The frame design allows bin crews to efficiently gain access to the bin, empty it and efficiently returning as the gate is fitted with a slamlock.</p> <p>A modular design allows for expansion of the system sets to accommodate additional bins and bin frames in the future. With minimal groundworks a single bin frame can be installed in 2 hours (approx.). Each Bin frame has a locking access gate, through which bin crews can easily gain access to the bin for emptying purposes. Each additional bin frame can accommodate signage (on the rear panel and on the door, which can be customised to suit the client's requirements. This can be used to communicate recycling information and/or community information.</p>
Taylor Standards	<ul style="list-style-type: none"> Locking access door, including slamlock Fully Galvanised mild steel construction Signage on rear panel (option) and door Strong hinge arrangement Adjustable stainless steel feet Delivered flatpack with all assembly bolts
Logo/Vinyl	<ul style="list-style-type: none"> Door retention signage panel
Finish	<ul style="list-style-type: none"> Fully Galvanised Frame
