DECORATIVE SORTED-WASTE CONTAINERS

BALLOON

A single, groupable sorted-waste bin model for creating recycling points in a limited space. Balloon is ideal for paper, plastic, cans or non-sorted waste collection. It is also equally safe for special waste collection such as expired medicines, exhausted batteries, toxic and flammable waste, electrical/electronic scrap, etc. The special anti-tamper access opening enables hygienic waste posting without touching the bin. An internal, removable container makes emptying easy and avoids leachate leakage.

SPECIFICATIONS

Material:

- 100% recyclable linear polythene. Moulded-in colour, UV inhibitor treatment
- Base and internal container made of recycled, recyclable plastic

Process:

- rotational moulding

Body:

- rectangular footprint, rounded front and rear panels, flat side panels
- anti-tamper, rainproof access opening
