MINIMAX

door-to-door

First-class efficiency for door-to-door collection

DOOR-TO-DOOR

MINIMAX

door-to-door

Designed by our Company in 1998 to launch an innovative system of intensive door-to-door sorted waste collection. The Minimax range is the most comprehensive actually available on the market.

TECHNICAL FEATURES

Material:

- virgin or reprocessed polypropylene, non-toxic and 100% recyclable, UV treated

Manufacturing process:

- injection moulding

Main body:

- square-tapered shape with square or rectangular (35 l) base and rounded edges
- perfectly smooth internal and external surfaces
- practical grip on the bottom for manual emptying

Lid:

- double-hinged to the body by means of hinge pins
- total lid opening 270°
- supplied already assembled on the body

Handle:

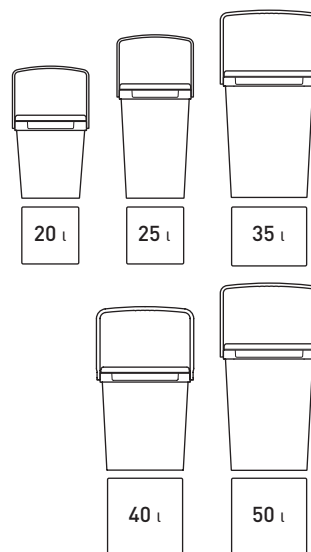

- for 20 and 25 l versions: in polypropylene, with 20x12 mm tubular structure and variable cross-section, made with air-moulding technology
- for 35, 40 and 50 l versions: in polypropylene, with 25x14 mm tubular structure and variable cross-section, made with air-moulding technology
- self-locking system of the lid and automatic opening in emptying phase

Standard colours:

- brown, green, blue, yellow, grey, anthracite
- other colours upon request for minimum quantities

Options:

- adhesives kit
- customized hot-printing
- progressive numbering or identification code bar
- application kit for transponder
